WOMEN & WELLNESS

All eyes were on the podium as several eminent personalities in the field of medicine came together for a seminar on health issues faced by women. Organised by the Apollo Centre of Excellence for Women (ACE) in association with the Duchess Club, the interactive session was held at Hotel Savera and was spearheaded by Dr Prithika Chary, Consultant Neurologist and Neurosurgeon, Dr Usha Sriram, Consultant Endocrinologist, Diabetes and Metabolism and Dr Jaishree Gajraj, Consultant Obstetrician and Gynecologist, all from Apollo Hospitals and ACE. An introductory power point presentation was followed by an interactive session with the guest panelists - Harold E Fox, MD, Director of Gynecology and Obstetrics, Johns Hopkins Medical Institutions, Baltimore, Professor Michael de Swiet, Emeritus Professor of Obstetric Medicine, London and Professor Justin C Konje, Professor of Obstetrics and Gynaecology, University of Leicester, UK. The panelists offered astute insights into topics ranging from menopause to breast cancer and pregnancy to seizures, leaving the women in the audience more well informed about their bodies at the end of the session!
